EDUCATION

UNIVERSITY OF PENNSYLVANIA ACADEMIC PAPER

RESEARCH ASSISTANT
 2022-2023 | Philadelphia, PA

UNIVERSITY OF MINNESOTA

B.S. IN COMPUTER SCIENCE
 2019-2022 | Minneapolis, MN
 Graduated with Distinction
 Cum. GPA: 3.83 / 4.0

RESEARCH INTERESTS

Diffusion Models
 Federated Learning
 Causality in AI
 Natural Language Processing
 • Controllable Text Generation
 • Prompt Engineering
 • Open Domain Question Answering
 Foundational Deep Learning
 Robustness
 Optimization

HONORS/AWARDS

2022 Google CSRMP^a Scholar
 Mentor: [Samira Daruki](#)^b
 2021 UROP^c scholarship
 2019-2021 CSE Dean's List^d
 2021 Tau Beta Pi^e

SKILLS

Programming • Python • C/C++
 Java • Shell • Javascript
 MATLAB • OCaml • MySQL
Tools • Pytorch • Tensorflow
 Keras • FedML • FedNLP
 Kubernetes • Unix/Linux • Git
 LaTeX • MONAI • Docker
 Eviews • Wind • Bloomberg
Mathematics • Matrix Theory
 Convex Optimization • Probability Theory
 Information Theory

^aCS Research Mentorship Program

RESEARCH

UNIVERSITY OF PENNSYLVANIA | RESEARCH ASSISTANT

May 2022 – Present | Remote

Foundational Deep Learning; Adversarial Examples

- I lead a project about **A New Perspective for Adversarial Examples via Local Elasticity**. Researching the reasons for the existence of **adversarial examples** and the property of their tiny norms. We aim to form a reasonable theory based on the elasticity of labels during neural training, referred as **Local Elasticity**. (advisor: [Prof. Weijie Su](#)^c)

UNIVERSITY OF MINNESOTA | RESEARCH ASSISTANT

Aug 2020 – Present | Minneapolis, MN

Minnesota NLP Group & Data Management Research Group (DMR)

Federated Learning; Causality in AI; Natural Language Processing

- I lead a project about **Covariate Shift Adaptation in Federated Learning for NLP**. This project aims to pioneer disentangled representation learning in building robust **federated learning** (FL) models in various Natural Language Processing (NLP) problems. Our research quickens the deployment of most state-of-the-art NLP systems toward covariant-shift inputs. We aim to propose a content-style-based FL scheme to outperform baseline FedAvg in **OOD generalization** across different domains. (advisor: [Prof. Dongyeop Kang](#))
 - I led a project about **de-biasing Large Pre-trained Language Models (PLMs) for in-context learning**. Presented a method inspired by **causal inference** to measure the **true causal effect** of the input text on possible labels more accurately and substantially increased the accuracy of PLMs in various tasks and reduces accuracy variance to achieve better robustness. (advisor: [Prof. Dongyeop Kang](#))
- Data Mining; Political Stance Detection; NLP in Social Media**
- I conducted user-level **stance detection** for Super Bowl **Team Affiliation** by semi-supervised framework and extended binary classification by Valence Score. Extracted Different target-related topics and eliminated noisy instances by weakly supervised learning for **Political Affiliation** on Twitter. (advisor: [Prof. Jaideep Srivastava](#)^d)

COURSEWORK

UNDERGRAD LEVEL

Data Structure and Algs (CSCI 4041)

Linux OS (CSCI 4061)

Artificial Intelligence (CSCI 4511W)

Prgm Graphics and Games (CSCI 4611)

GRAD LEVEL

Machine Learning (CSCI 5525)

Deep Learning (CSCI 5980)

Computer Vision (CSCI 5561)

Biomedical NLP (HINF 5610)

ML Fundamentals (CSCI 5521)

Engineering Optimization (MATH 5711)

Note: The levels of courses above

are categorized based on

<https://cse.umn.edu/cs/grad-breadth>.

An undergrad is allowed to take

grad courses under instructor's approval.

SELECTED

COURSE PROJECT

CSCI 5525 Machine Learning:

Analysis and Methods (Spring 2021)

- A Survey of Causality in Visual Question Answering

[z.umn.edu/causalvqa], Grade: A

HINF 5610 Biomedical NLP

(Spring 2021)

- Text Simplification for Leadless Pacemaker Failure Reports in MAUDE

[z.umn.edu/biomednlp], Grade: A

STUDY GROUPS

UMN Café GNNs in NLP

Graph Neural Networks in NLP

Reading Group

UMD MARL

Multi-agent Reinforcement Learning

Reading Group

UNIVERSITY OF MARYLAND | RESEARCH ASSISTANT

June 2021 – June 2022 | College Park, MD

Computational Linguistics and Information Processing (CLIP)

Open-domain Question Answering; Domain Adaptation

- I *co-led* a project about Improving QA Systems on Transformed Trivia Questions by transferring knowledge from a new, out-of-domain question answering dataset (QuizBowl) where the questions are much longer than the kind of question you would typically see asked of Siri or Alexa. Proposed methods to **decode convoluted syntax** and to automatically generate information-seeking questions, resembling web queries in the style of Natural Questions (NQ). Presented fine-grained analysis on **linguistic, grammatical, style and topic dependent features** toward understanding what specifically attributes to better questions generations for the **domain desired**. Boosted passage retriever by adapting it to new domains. (advisor: [Prof. Jordan Boyd-Graber](#))

UNIVERSITY OF ROCHESTER, NEW YORK | RESEARCH ASSISTANT

June 2020 – Oct 2020 | Remote

Signal Processing and Information Systems Laboratory (SPIS)

Signal Processing; EEG signal

- Implemented various Deep Learning models (e.g. LSTM with AutoEncoder, parallel CNN and RNN) on DEAP dataset for better emotional classification. Compared different insightful ways for data preprocessing including shuffling and taking the base signal into consideration. (advisor: [Prof. Mujdat Cetin^a](#))

EXPERIENCE

ZHONGDA INNOVATION VALLEY INC. | QUANT FINANCE INTERN

Sep 2018 – Dec 2018 | Shenzhen, CHN

- Finalized analysis of factor performance by Alphalens and Signaldigger in Python and data processing by Ta-lib and JAQS
- Implemented multi-factor combination and visualization for financial trading report
- Proposed new signal hypothesis by customizing ANN factors and implemented the assumptions to corroborate the efficiency of the hypothesis

AXA HONG KONG | CORPORATE AND INDUSTRY RESEARCH INTERN

Feb 2018 – May 2018 | Hong Kong, CHN

- Employed decentralized investments to reduce risk and the Markowitz model to calculate optimal industry weights based on historical data
- Conducted stock price prediction using models such as CAPM and WACC; chosen Tencent as Star Price Stock and presented the report
- Involved in macro-economic research, collecting and sorting global financial news for investment strategy adjustment purposes

TEACHING & TUTORING

UNIVERSITY OF MARYLAND | HS^b RESEARCH MENTORING ASSIST^c

June 2021 – Dec 2021 | Remote

- Mentor high school interns on the research project, tutor them with basic research skills such as documentation writing, research question framing, hands on coding, etc.

UNIVERSITY OF MINNESOTA LIBRARY | PEER TUTOR

Sep 2020 – Dec 2020 | Minneapolis, MN

- Tutor single-and-multivariable calculus, linear algebra, intro physics, intro stats and some programming in Python and C.
